Coverage = skill-level coverage of the official guide (98 skills; covered = 1, partly = ½, weighted by domain). Projected values for planned days.
Confidence = my estimate of how well you'd answer real exam questions on that day's topics, based on your quiz and practice results.

2. Coverage and confidence by exam domain

Domain	Exam weight	Covered	Confidence	Notes
1. FM integration, data management, compliance	31%	100% (28 of 28 skills)	85%	1.3 on End Game Day
2. Implementation and integration	26%	100% (25 of 25)	85%	2.3 / 2.5 on End Game Day
3. AI safety, security, governance	20%	100% (15 ✓ of 15)	85%	Complete
4. Operational efficiency and optimisation	12%	100% (16 of 16)	78%	Days 7–8 quiz 67%; 4.3 monitoring End Game 100%
5. Testing, validation, troubleshooting	11%	100% (14 of 14)	85%	5.1 / 5.2 End Game Day

3. Practice sets and mock exams

Assessment	Date	Score	Target	Status
Practice Set 1 (Days 1–3, 30 Q)	23 Oct	26/30 = 87%	≥ 75%	✓ Above target
Gap-lesson quiz (12 Q, exam-style options)	26 Oct	12/12 = 100%	≥ 75%	✓ Above target
Day 6 quiz (12 Q, 7 hard)	29 Oct	12/12 = 100%	≥ 75%	✓ Above target
Days 7–8 quiz (self-study, 12 Q)	30 Oct	8/12 = 67%	≥ 75%	✗ Below — revise

Full Mock 1 (65 Q, self-study with answers)	9 Nov	—	≥ 75%	Used for review on exam morning
AIP-C01 REAL EXAM	9 Nov	**791 / 1000**	750	**PASSED — CERTIFIED**

Readiness rule: mocks ≥ 75% → ready; 65–75% → focus on weakest tasks; below 65% by 3 Nov → discuss rescheduling.

4. Lab backlog

- Day 2 — Converse API tool loop (needs model quota or the Anthropic API key).
- Day 3 — Strands single + supervisor agents (code); AgentCore console lab Parts A–E.
- Day 4 — Security console lab, at least Part A (IAM Policy Simulator) and Part G (Guardrail PII).
- Day 5 — Console lab, start with Part B (request the TPM quota increase).

5. Next session

Exam: Mon 9 Nov, 1:30 PM IST. Learner's plan: review all PDFs (2 h) → cheat sheet + glossary (1 h) → AWS Skill Builder / Tutorials Dojo practice questions and our practice sets until 12:30 PM. In the exam: answer every question, flag and return, list each requirement and strike options that fail any one.
